

Implementation Science

A Beginners Guide!

.....

An introduction to the key ideas and concepts of Implementation Science – perfect for anyone working (or researching) in services for people, who is hearing about 'implementation science' and wonders what it all means and how it is relevant to their own work.

Implementation Week 2019

July 15 – 19th 2019

What is Implementation Science?

How can it help me bring about change and improve productivity in my organisation?

This event is for anyone who'd like to know more about implementation science and how it relates to services for people.

We welcome practitioners tasked with implementing new policies, projects and practices, and researchers and others new to the field.

The UK Implementation Society invites you to join two of our Board Members for an afternoon of presentations, case studies and discussions all focused on the field of implementation science in London, July 15th, as part of *Implementation Week 2019*.

The event will begin with some short presentations sharing information about the key concepts and ideas behind implementation science, and follow this with a couple of case study examples showing implementation science in practice.

The remainder of the event will focus on how implementation science might help inform individual practice, where you can seek further advice, training and information and introduce you to the implementation science community.

The UK Implementation Society is an independent membership organisation and a registered charity connecting those working in implementation science, practice and policy for services for people. The UK Implementation Society promotes, increase and sustains knowledge and understanding of the science of implementation in public benefit services. We aim to advance practice in applying this knowledge on the ground, especially in the particular contexts of UK services and systems.

Is any prior knowledge or preparation necessary?

No, but we would invite you to come with any questions you would like answering and we will try to address them.

All questions Welcome!

Professor Annette Boaz graduated with a degree in Politics from the University of Durham in 1993. She also completed a Masters in Social Research at the University of Oxford and a doctorate in Politics at Queen Mary, University of London. She is currently Professor of Health Care Research and St George's University of London and Kingston University.

Prior to her current role she has worked at the Universities of Oxford, Warwick, Queen Mary, University of London and Kings College London. She also completed a secondment to the Policy Research Programme at the UK Department of Health.

She has spent more than 20 years exploring the relationship between research, policy and practice in the UK and internationally. She was a Founder Editor of the international journal Evidence & Policy. She has conducted research for a range of funders including the UK National Institute for Health Research (NIHR), the Economic and Social Research Council and the European Commission.

She supports a number of national initiatives aimed at increasing capacity for research use including the NIHR Knowledge Mobilization Fellowship scheme and the UK Implementation Society and in 2018 she was a member of the panel for the Irish Health Research Board Impact Award. She is a member of the World Health Organisation European Advisory Committee on Health Research. With Kathryn Oliver she leads a collaboration designed to transform the use of research evidence (Transform URE). With Huw Davies, Sandra Nutley and Alec Fraser she has edited a new book 'What Works Now: Evidence Informed Policy and Practice' which was published in March 2019.

Tom Jefford worked in Local Government for 25 years (Youth Offending, alternative education, MST, community safety and Drug and Alcohol services) before establishing a spin out Social Enterprise, Family Psychology Mutual of which he is joint CEO. FPM specialises in edge of care services and is delivering services in Norfolk Suffolk and London. Tom was a board member of CSSL which delivered the Social Impact Bond in Essex using Multi Systemic Therapy.

He has a long standing interest in evidence based interventions for children and young people and will shortly be awarded a professional doctoral from Anglia Ruskin University concerning implementation of Multi Systemic Therapy in three Local Government settings.

He supports a social enterprise which is a café run by people in recovery in Cambridge and is a founding board member of both the UK Implementation Society and of the European Implementation Collaborative. He was previously a fellow at the Go Lab at Oxford.
